What is personal property?

Personal property is anything that isn't real property. In most cases, it includes things such as:

- Machinery & equipment for: construction, manufacturing, and agricultural purposes
- Computers, printers, copiers, and software
- Store fixtures / equipment / signage
- Desks, chairs, and other furniture

Typical household goods that you own are exempt. However, if you use any items in a business, they may be taxable.

What if I don't have a federal depreciation report?

Businesses usually have a federal depreciation report / schedule, fixed asset list, equipment inventory list, or some sort of record that shows what machinery / equipment / furniture is located at a specific location. Any of these documents will work. If you don't have any of these, please contact the person who sent you this letter and they will be able to explain what other records might work.

What do you want when you are asking for supplies, tools / spare parts, and fuel / propane?

We are only looking at things that are stored on site, for business use - we do not want your inventory. Examples:

- you purchased supplies during the year that add up to \$600 and you typically keep a month's worth on hand
- A value of tools and spare parts kept on site that aren't listed on your depreciation report
- you have a 500-gallon tank of fuel / propane on site which is typically half full, and your fuel cost for the year is about \$2.50 a gallon

What do you mean by expensed and homemade or self-manufactured items?

An expensed item is any asset not included on a depreciation report. What we need from you is:

- A list of expensed items – this should include a description, year purchased, and cost
- Any homemade or self-manufactured items – this should include a description, year built, and estimated value

If you would like a secure option to send your documents please contact me.
